Message from the Director General

The first phase of the new competency based curriculum, with 8 years curriculum cycle was introduced to secondary education in Sri Lanka in 2007 replacing the existed content based education system with basic objective of developing the national level competencies recommended by the National Education Commission.

The second phase of the curriculum cycle to be introduced to grades 7 and 11 starts from 2016. For this purpose, National Institute of Education has introduced a rationalization process and developed rationalized syllabi for these grades using research based outcomes and various suggestions made by different stakeholders.

In the rationalization process, vertical integration has been used to systematically develop the competency levels in all subjects from fundamentals to advanced levels using the bottom up approach. Horizontal integration is used to minimize the overlapping in the subject content and to reduce the content over loading in the subjects to produce more students friendly and implementable curricular.

A new format has been introduced to the teachers’ guide with the aim of providing the teachers with the required guidance in the areas of lesson planning, teaching, carrying out activities and measurement and evaluation. These guidelines will help the teachers to be more productive and effective in the classroom.

The new teachers’ guides provide freedom to the teachers in selecting quality inputs and additional activities to develop the competencies of the students. The new teachers’ guides are not loaded with subject content that is covered in the recommended textbooks. Therefore, it is essential for the teacher to use the new teachers’ guides simultaneously with the relevant textbooks prepared by Education Publication Department as reference guides to be more aware of the syllabi.

The basic objectives of the rationalized syllabi and the new format of teachers’ guide and newly developed textbooks are to bring a shift from the teacher centered education system into a student centered and more activity based education system in order to develop the competencies and skills of the school leavers and to enable the system to produce suitable human resource to the world of work.

I would like to take this opportunity to thank the members of Academic Affairs Board and Council of National Institute of Education and all the resource persons who have immensely contributed in developing these new teacher guides.

Foreword

Learning expands into a wider scope. It makes life enormous and extremely simple. The human being is naturally excellent in the skill of learning. A country when human development is considered the main focus uses learning as a tool to do away with malpractices identified with intellect and to create a better world through good practices.

It is essential to create valuable things for learning and learning methods and facilities within the sphere of education. That is how the curriculum, syllabi, teachers' guides and facilitators join the learning system.

Modern Sri Lanka has possessed a self-directed education system which is a blend of global trends as well as ancient heritage.

It is necessary to maintain the consistency of the objectives of the subject at the national level. However, facilitators are free to modify or adapt learning teaching strategies creatively to achieve the learning outcomes, competency and competency level via the subject content prescribed in the syllabus. Therefore, this Teachers' Guide has been prepared to promote the teachers' role and to support the students as well as the parents.

Furthermore, at the end of a lesson, the facilitators of the learning-teaching process along with the students should come to a verification of the achievement level on par with ones expected exam by a national level examiner, who evaluates the achievement levels of subjects expected. I sincerely wish to create such a self-progressive, motivational culture in the learning-teaching process. Blended with that verification, this Teachers' Guide would definitely be a canoe or a raft in this endeavor.

Message of the Commissioner General

Teachers are leading personalities among those who render a great service for the progression of the society. Teachers guide the children to mould their characters.

The Educational Publications Department takes measures to print and publish these Teacher Instructional Manuals to facilitate the teachers to carry out the teaching process successfully in accordance with the new syllabi to be implemented with effect from 2015. I strongly believe that this Teacher Instructional Manual complied by the National Institute of Education will provide the required guidance to create a favourable learning environment for the children to learn.

This venture will achieve its success on the effort made to utilize the experience acquired by using this Teacher Instructional Manual in the teaching learning process. I bestow my gratitude on all those who dedicated themselves for this national endeavour.

Instructions regarding the Teachers’ Guide

The first competency based French Language syllabus for grade 10 which is to be implemented in 2015 has 44 competency levels to be achieved by the students of grade 10. A grade 10 course material consists of the Teachers’ Guide.

This Teachers’ Guide consists of the detailed syllabus of grade 10, instructions for lesson planning, instructions for assessment and evaluation and web links given as further reference. They are quite useful in understanding and making the teacher familiar with a given competency level. Sample activities along with lesson notes that are useful to achieve the expected learning outcomes for required competency levels are also given in an integrated manner. Since the number of periods has been notionally included, it is up to the teachers to plan the lessons accordingly based on each competency level and the outcome.

Since the educational publication department is not involved in developing text books for this subject the text books Tricole Total (1 &2) that are readily available in Sri Lanka, can be used to enhance the teaching Learning process. They are relevant to the new syllabi to a greater extent. Further, their attractive lessons, which motivate the adolescents to master the subject, with an up to date vocabulary and listening activities and a work book, are a convenient source of reference to both teachers and students in French language pedagogy. In addition to that, J.R.Watson’s (1 and 2), Apprenons le Français (2 and 3), Enchanté (1,2,3 and 4), Esprit (1,2, and 3) and Dondo can also be recommended to teachers as further references enabling them for selecting activities creatively according to the level and interest of students.

Teachers are requested to expose their target language as much as possible so that it helps the students to improve their confidence in all 4 language skills; speaking, listening, reading and writing. However, teachers have the opportunity to be creative and innovative, and prepare their own lesson plans, so that their students will learn and acquire quickly and use their target foreign language correctly as and when they are required to do so.

Bonne Chance!

Instructions for lesson planning

The first competency identifies pronunciation as one of the most important aspects of learning French as a foreign language. Since students of French commence learning their
target language as late as in Grade 10, it is important to teach them explicitly and make them familiar with the sounds of their target language from the very start. The teachers are thus requested to lay emphasis on activities aiming at facilitating students to identify the letters of the French alphabet, acquire specific sounds and phonological features of the French language.

- **Identify vowels and consonants**
  
  - Familiarize students with the alphabet through games and activities
    
    Eg: Introduce the alphabet in the form of a song; get students to spell their names as well as their friends’
  
  - Through words and expressions, introduce vowel and consonant sounds
    
    The teacher is expected to correctly identify and familiarize himself/herself with the vowel and consonant sounds of the French language and help students acquire correct pronunciation.
    
    Please note that the following table is for the teacher’s reference only. It is not intended in any way to be taught as such to the students.

- **Practice liaison and enchainement**

  - Introduce liaison and enchainement through simple phrases and sentences

**Liaison:** Il y a liaison quand la consonne finale muette (qui n’est pas prononcée devant une consonne) d’un mot se prononce devant la voyelle initiale du mot suivant. La liaison se fait seulement entre les mots unis par le sens:

  Eg. *Des enfants* [dezɑfɛ̃]; *en Espagne* [ãnespaɲ]; *Les amis* [lezamî], *ils ont* [iɛlɔ] *mon ami*; *premier étage*; *le premier avril*; *elle est architecte*; *nous sommes en retard*; *de moins en mois*; *tout à fait*; *Champs-Élysées*; etc.

**Enchaînement:** Il y a enchaînement quand on prononce la consonne finale d’un mot avec le mot suivant sans séparation ni pause. Parfois la consonne est suivie par un e muet qui précède une voyelle du mot suivant ou d’une autre consonne non prononcée:

  Eg. *Elle adore Arthur* [ɛlɔdɔRatʁ] ; *il est une heure à Paris* [ilɛtyneR]; *mon oncle Edouard*; *une visite officielle*; *elle aime organiser une enquête*; *il est treize heures à Paris*; etc.

(or go to http://www.sonoma.edu and search for ‘liaison’)

Cf. 2. [http://en.wikipedia.org/wiki/Liaison_%C2%B928French%C2%B9](http://en.wikipedia.org/wiki/Liaison_%C2%B928French%C2%B9)
• Practice intonation

Practice changes in intonation patterns in French when making assertions, commands, asking questions.

➢ Explain how intonation patterns change according to the intention of the speaker.

1) Making an assertion: “Tu écris une lettre”. (intonation is low at the beginning of the sentence and goes down at the end of the sentence)
2) Making a command: “Ecris une lettre!” (intonation is quite high at the beginning of the sentence but goes down rapidly until it reaches the end of the sentence)
3) Asking a question: “Peux-tu écrire une lettre?” (the intonation is raised at the end of the sentence)

➢ The teacher could read phrases with different intonations and ask students to repeat the same keeping the same intonation.

➢ Students are requested to identify assertive, imperative and interrogative sentences for what they are.

• Read aloud basic texts

➢ Practice reading aloud: The teacher reads short sentences aloud and asks students to repeat after her/him. The teacher corrects the errors they make in pronunciation, intonation and rhythm.

➢ Distribute simple and short texts amongst students and ask them to read them aloud. The other students are encouraged to correct the errors the reader makes.

➢ Ask students to read short poems.

Assessment and evaluation

The formative assessment of students’ pronunciation skills is to be done throughout the year via brief oral tests (testing pronunciation of isolated words, reading sentences and short texts). However, more emphasis should be given to developing and testing this competency during the initial stages of learning. A summative evaluation is to be done at each term test.
**Competency 02**

**Uses mechanics of writing with understanding**

**Competency level:** 2.1  Uses capital letters and simple letters appropriately

**Learning outcome:** Students will be able to write simple sentences correctly and meaningfully using basic writing techniques.

- Use capital and simple letters when writing in French

**Competency level:** 2.2  Uses graphical accents in French correctly

**Learning outcome:** Students will be able to write simple sentences correctly and meaningfully using basic writing techniques.

- Identify and use accents correctly (Grave, aigu, cédille, tréma, circonflexe)

**Competency level:** 2.3  Uses basic punctuation marks appropriately

**Learning outcome:** Students will be able to write simple sentences correctly and meaningfully using basic writing techniques.

- Identify punctuation marks (Full stop, apostrophe, question mark, comma, exclamation mark, inverted comma)

**No of periods:** 03

**Instructions for lesson planning**

It is of high importance that the students learn to use the correct mechanics of writing from the beginning. It is of equal importance that the students understand what they are and express them in writing.

- Explain to students the different cases where capital letters are used
  Eg: at the beginning of a sentence, proper nouns, nationality as a noun (*C’est un Français*)
- Explain to students the different cases where simple letters are used
  Eg: months of the year, days of the week, seasons, subject pronouns in the middle of the sentence, nationality as an adjective (*il est français*)
- Explain the use of different French accents
Eg: - aigu (é) : école, étudiant, éléphant - pronunciation [e]
- Grave (è, à, ù) : père, mère, très, colère, - pronunciation [ɛ]
  à, où, là, voilà
- Cédille : garçon [gaRkɔ]/ garçon [gaRsɔ], leçon
  (cédille is used when the letter “c” is followed by the vowels a / o / u as [k]. In
  order to pronounce the letter “c” as [s] in such cases, you need to write “c”
  with a cédille (ç)
- Tréma (ë, ï) : noël, Hanoï,
- Circonflexe (â, ê, ô, ï, û) : vêtements, pâte, hôtel, chaîne, flûte

Assessment and evaluation

In order to strengthen the mechanics of writing the students need to be assessed through
formative and summative evaluations.

No of Periods: 08

Instructions for lesson planning

Listening is one of the most important competencies to be developed in language learning. Equal importance should be given to the enhancement of listening skills as it constitutes a major component in communication. The students are expected to listen to and understand given instructions, monologues and dialogues related to their day to day life when the interlocutor articulates his words and sentences distinctively and slowly.

- Students follow the instructions given by the teacher and give instructions to peers
Eg: écoute !, écoutez ! / regarde !, regardez ! / répondez !, répondez ! / Copie!, copiez !/ écris !, écrivez !/ ne parle pas !, ne parlez pas !, etc.

- Use simple questions to which the students respond spontaneously
  Eg: Il est où, Paul? / Tu comprends, Vous comprenez ?

- Use auditory texts which include simple instructions related to immediate environment and make students follow them
  Eg: Ecoutez l’enregistrement et répondez aux questions suivantes.

- Use auditory texts to introduce different intonation patterns and make students repeat words, expressions and utterances with the appropriate intonation used in:

**Assessment and Evaluation**

Since listening is considered as a significant part of learning a language, it is important to assess the students throughout the year. It is compulsory to include listening tests for the School Based Assessment so that the students will also acknowledge the importance of listening.

Instructions for lesson planning

The correct formation and use of syntactic structures occupy a pivotal place in communication. The knowledge on the meaningful placement of lexical items in a sentence or an utterance needs to be developed from the very beginning of the language teaching learning process. Therefore, the teachers as well as the students concentrate on acquiring the knowledge in forming syntactically correct utterances in written and oral communication.

- Practice using some of the determiners according to the meaning of the utterance

Determiners: They help to introduce a noun in a sentence.

- **Definite Article** agrees with the gender and number of the noun to which it relates

Definite Articles are used in the following instances

Some of the uses of conjunctions indicate the union (*et*), the opposition (*mais*), the alternative (*ni/ ou*), the consequence (*donc*) the cause (*car*) and the conclusion (*enfin*).

**Assessment and evaluation**

Language acquisition requires the students to understand and formulate meaningful syntactic structures in written and oral communication. Therefore, from the very beginning, the student is encouraged to communicate accurately using different syntactic structures. It is equally important to assess the acquisition of this competency throughout the year in the form of formative and summative evaluation. The form of evaluation will be done on criteria basis.

Assessment and evaluation

In order to develop students’ writing skills in French, their writing needs to be constantly evaluated by the teacher throughout the year. Right from the start, students should be given small texts to write at home and the teacher should make himself/herself available to correct these and discuss them with the relevant student. The teacher can also get students to work in groups, discuss and correct their texts themselves.

In addition to doing a summative evaluation at the end of the term / year, the teacher can get students to write a series of short texts (in class or as homework) throughout the year and attribute them every time a mark / grade; encouraging language students to practice writing in a systematic way is in fact quite essential to developing their writing skills.

**Assessment and Evaluation**

Developing the spoken discourse of language students need to be assessed from the very beginning. A similar attitude has to be adopted by the teacher in practicing spoken skills as much as developing the writing skills of the learner. Thus, speech should be evaluated throughout the year in the form of formative evaluation by creating opportunities for the students to participate in activities where they can practice spoken French. In addition to formative evaluation, spoken discourse should be a compulsory component of the summative evaluation conducted as school based assessments.
